

WHY IS ARIENS® THE #1 SNO-THRO® BRAND WORLDWIDE?

Ariens Sno-Thro machines are engineered for durability and performance in moving snow, and backed by an industry-leading 3-year warranty.

THE BUILT-IN DURABILITY

- All-steel construction, including chutes
- Extra steel is utilized where it is most critical, such as drive shafts and auger gears
- Reinforced and gusseted fully-welded frames
- Emphasis on strong gear box construction, including gears and shafts
- Large diameter axles/gear case shafts
- Rolled lip on blower housing and reinforced ribbing on the side panels for additional housing strength
- High duty cycle drive trains for years of reliability and performance

THE BUILT-IN PERFORMANCE

- Maximum flow efficiency uses all available horsepower to provide higher discharge capacity and increased throwing distance
- High-performance final drive ratio maximizes wheel torque
- Larger-diameter impellers eliminate the flow bottleneck that is present in most other brands

THE BUILT-IN CONFIDENCE

- The first Ariens Sno-Thro was introduced in 1960, and the company has since produced more than 2.3 million machines
- Ariens Sno-Thro models are put through some of the most extensive field testing in the industry—field testing each new model through 20 years of extreme winter use in a single season
- Ariens Sno-Thro machines are supported by an independent dealer network for sales and service
- Ariens Sno-Thro machines are often passed down from generation to generation

Not only does Ariens make outstanding Sno-Thro units, but check out the quality lawn products at your local dealer.

PROFESSIONAL SERIES

The Professional Series delivers extra performance and durability, featuring Automatic Traction Control that provides maximum traction and easy steering automatically without triggers or levers.

FEATURES:

- Cast iron auger gear box housing for maximum impact protection against debris and ice
- Dual auger belt drive is able to continuously transmit 100% of the engine power directly to the blower head with no maintenance adjustments needed
- Large 14" impeller diameter provides maximum performance
- Large 16" augers move more snow faster (largest in class)
- Quick-Turn chute rotation for quick & effortless chute control
- 23.5" housing height to take in large amount of snow
- Standard features include halogen headlights, hand warmers and remote deflector control
- Track options available

DELUXE PLATINUM SERIES

The Deluxe Platinum Series is new to the Ariens family of Sno-Thro machines bringing the advantage of the Deluxe Series platform with the addition of the Professional Series features.

FEATURES:

- Automatic Traction Control that provides maximum traction and easy steering automatically without triggers or levers
- Dual auger belt drive is able to continuously transmit 100% of the engine power directly to the blower head with no maintenance adjustments needed
- Large 14" impeller diameter provides maximum performance
- Heavy Duty XS aluminum auger gear case with steel gears provides superior strength
- Quick-Turn chute rotation for quick and effortless chute control
- Standard features include halogen headlights, hand warmers and remote deflector control

DELUXE SERIES

The Deluxe Series is designed from the ground up to maximize performance with 14" diameter impellers to ensure the housing is utilized to full capacity.

FEATURES:

- Dual auger belt drive is able to continuously transmit 100% of the engine power directly to the blower head with no maintenance adjustments needed
- Remote locking axle for superior traction and easy steering on larger models
- High performance final drive ratio ensures higher torque at wheels and provides superior traction through deep snow
- Heavy Duty XS aluminum auger gear case with steel gears provides superior strength
- Track options available

COMPACT SERIES

The Compact Series is an exceptional value, combining full-sized performance with a user-friendly, manageable machine.

FEATURES:

- One of the largest impellers in its class (12" diameter) for superior performance
- Dual handle interlock allows the operator to change the discharge chute direction without stopping or slowing the machine
- 13" directional snow tread tires
- Pin-lock axle for high traction 2-wheel drive or maneuverable one-wheel drive
- Steel chute for durability

SNO-TEK™ BY ARIENS®

Sno-Tek by Ariens is an entry-level two-stage snowthrower that is durable and reliable, yet value-priced.

FEATURES:

- Generally larger engines than competitive models
- Stronger polymer chute with steel cap
- Steel dash panel
- Gusseted and reinforced fully welded frames
