PRICE	\$3965	\$5321	\$6360

HOW TO CHOOSE YOUR ZERO-TURN ?

Choosing wisely your next zero-turn can make you save time and money. Here are some tips that will help you with your next purchase.

NUMBER OF OBSTACLES IN YOUR YARD

Maneuvering around obstacles is necessary when mowing. If there are many obstacles such as trees, flower beds or landscaping in your yard, choose a zero-turn without hesitation. Tractors can be limited in their ability to maneuver around objects and may require additional follow-up trimming.

YARD SIZE

Selecting the right zero-turn starts with the size of your yard. Matching the deck size will help you mow more efficiently. See the chart below for recommended deck sizes.

YARD SIZE	RECOMMENDED DECK SIZE	RECOMMENDED PRODUCT
Less than 43 000 ft²	Up to 107 cm (42 in)	Edge, Ikon XD
43 000 to 87 000 ft²	107 cm to 122 cm (42 in to 48 in)	Edge, Ikon XD, Apex®, Zenith®
87 000 ft² or more	117 cm to 152 cm (46 in to 60 in)	Ikon XD, Apex®, Zenith®

ZERO-TURN MOWER BENEFITS

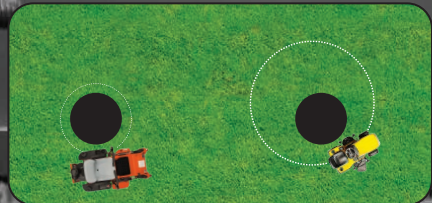

YOU CAN CUT YOUR MOWING TIME IN HALF USING A ZERO-TURN INSTEAD OF A LAWN TRACTOR. HERE ARE SOME OF THE TIME-SAVING FEATURES OF ZERO-TURN TECHNOLOGY.

FASTER SPEED

Zero-turn are designed to cut grass nearly twice as fast as traditional lawn tractors so your straight line mowing speed is improved.

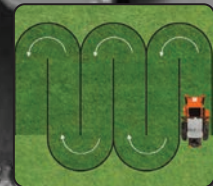

MANEUVER AROUND OBSTACLES

The maneuverability of zero-turn allows you to easily mow around trees, flower beds and other obstacles in your yard more easily than with a steering wheel vehicle such as a riding lawn tractor.

MOW IN A SINGLE PASS

When you get to the end of your yard and have to turn around and come back, you literally can spin 180° and come straight back without having to back up and cut the strips of grass you would miss when making the turn with a lawn tractor. When all things are equal, a zero-turn will allow you to cut your lawn more efficiently.
