

our **power**, your **passion**

Product & Accessory Catalog

History

For over 40 years, **Efco** has continuously delivered legendary innovation and performance from the world famous Italy province, Reggio Emilia. With each piece of equipment sent out, we guarantee to meet your needs and expectations. We are so confident, we back all of our outdoor power equipment with industry-leading warranties. Pick up an **Efco** today and see why **Efco** is power you can trust.

Structure

The **Emak Group** is active in the development, production and worldwide sale of an extensive range of products for three business segments:

Outdoor Power Equipment

- products for gardening, forestry and agriculture, including brushcutters, lawnmowers, garden tractors, chainsaws, rotary tillers and rotary cultivators.

Pumps and High Pressure Water Jetting

- products for agriculture, including centrifugal and diaphragm pumps for crop spraying and weed control;
- products for industry, including pumps for industrial applications and high and very-high pressure systems;
- products for cleaning, namely professional and semiprofessional high-pressure washers, floor scrubber-dryers and vacuum sweepers.

Components and Accessories

- products such as trimmer line and line heads for brushcutters, accessories for chainsaws, guns, valves and nozzles for high-pressure washers and for agricultural applications, plus precision farming products (sensors and computers).

The group has around **2,000 employees** overall and generates annual sales of more than **EUR 400 million**.

Warranty summary

PRODUCT CATEGORY	PERSONAL USE	COMMERCIAL USE	RENTAL USE
Chainsaws/Pruners excluding MTH Series	5 years	2 years	90 Days
Chainsaws MTH Series	1 year	N/A	N/A
Trimmers/Brushcutters excluding DSH Series	5 years	2 years	90 Days
Trimmers/Brushcutters DSH Series	1 year	N/A	N/A
Blowers	5 years	2 years	90 Days
Hedge Trimmers	5 years	2 years	90 Days
Split Boom + Attachments	5 years	2 years	90 Days
Earth Auger	5 years	2 years	90 Days

DEFINITION OF USE:

Personal Use: Personal, residential, non-institutional and non-income producing use

Commercial Use: Business, commercial, institutional or income producing use

Rental Use: Rental income producing use

Symbols

	EasyOn User-friendly starting system ensures a smooth pick-up of the engine with no kickback, and limits the number of pulls required.
	Compression Relief Used during the starting cycle, this feature temporarily reduces the cylinder compression, allowing an easy start with less pulling effort.
	Lateral Chain Tensioner With side chain tensioning, tightening the chain is simple, easy and keeps your hands away from the sharp chain.
	OnBoard Clutch Reduces the risk of the clutch jamming and simplifies routine maintenance while also making for easier chain replacements.
	VibCut An antivibration system that completely isolates the engine from the handles and body of the machine thereby dramatically reducing vibration for maximum comfort and minimizing fatigue.
	AlwaysOn AlwaysOn On/Off switch that returns automatically to the "On" position after each stop, thus eliminating the risk of flooding the carburetor.
	Equipped with Load&Go The product is equipped with an Efco Load&Go trimmer head for use with Efco Powerline trimmer line.
	Original accessories and spare parts Quality mark identifying original Emak parts and accessories. Designed to the most stringent quality standards, these items guarantee smoother operation of the machine and longer service life.
	Premium Safety A complete line of protective work clothing. Ensures maximum safety without restricting movement.

Home-plus

Home-plus

A range of machines aimed at the home user, for tidying and cleaning the garden, cutting hedges and small trunks or stems, and DIY jobs in general. Characterized by lightweight and compact construction, to make the task of the operator that much simpler. Easy to start, easy to use, easy to maintain: these are the ideal tools for getting things done quickly and neatly around the home.

Tough-tech

Tough-tech

Solid and dependable, these are machines designed for heavy and frequent use in countryside environments: clearing overgrown and uncultivated areas, pruning and cutting firewood, crop irrigation and disinfection tasks. Designed adopting solutions certain to ensure high work rates and maximum durability over time.

Sharp-pro

Sharp-pro

No-nonsense everyday tools for the busy professional, these are machines that stand out for the toughness of their components, their high performance and their matchless long-term durability. Specific materials used in construction guarantee unwavering quality even when tackling the most severe and lengthy of tasks, like forestry work and the clearance of uncultivated areas or scrub and undergrowth.

Warranty

Five Year, No Fear Warranty™

With a five year consumer warranty, there is no doubt **Efco** has complete confidence in the quality, construction and durability of all **Efco** products. You can purchase each machine knowing that you can use them to their full potential year after year maintaining your property and starting new projects. The Five Year, No Fear Warranty™ assures you that our company will stand behind our products 100 percent. **Efco** products are power you can trust.

2 Year Titanium Commercial Warranty

Efco wants commercial users to know they can use **Efco** products for their business with the certainty that we will stand behind them. The 2 Year Titanium Commercial Warranty means users don't need to worry about whether the products will last. You can focus on business and be positive that your **Efco** products will work job after job. With our industry-leading commercial warranty, ONE of the only 2 year commercial chainsaw warranties in America, our company stands behind our products.

1 Year H Series Warranty

All H series products from **Efco** provide homeowners with a quality product at a great value and are backed by a one year consumer warranty. You can count on H series products to deliver performance and dependability at home or on the farm.

Powerful, versatile and easy to use: your indispensable helpmates for cutting and pruning.

Common features

Efco chainsaws come in a full range of models designed to offer the right solution to individual requirements. Pruning, felling, lopping: **Efco** offers models with different specifications to suit your needs. Each and every chainsaw in the range is characterized by top quality, reliable performance, ease of use and maintenance. Furthermore, the engine's low fuel consumption and linear torque-speed ensures premium performance even during extended periods of continuous work. All machines are fitted with the very best safety devices to provide the protection that everyone deserves.

1 The decompression valve facilitates starting (models **MT 5200**, **MT 6500**).

2 The "EasyOn" starting system ensures any user can get the machine running simply and effortlessly with a minimal number of pulls (models **MT 3750**, **MT 4400**, **MTH 5100**, **MTH 5600**, **MTT 2500**, **MTT 3600**).

3 The air purge facilitates starting even in the harshest climates (models **MTT 2500**, **MTT 3600**, **MT 3500 S**, **MT 3750**, **MT 4400**, **MTH 5100**, **MTH 5600**, **MT 5200**).

4 Forged steel crankshaft and piston with two rings for greater strength and durability (includes all models except **MT 3500 S**).

5 On/Off switch, choke and throttle lock incorporated into one easy switch for simple operation (models **MT 3500 S**, **MT 3750**, **MT 4400**, **MT 6500**).

6 Carburetor with anti-vibration mount guarantees stable fuel delivery whatever the operating conditions are (models **MT 3500 S**, **MT 6500**).

7 Aluminium oil pump: ensures zero flow with engine idling and long, durable service.

8 Fuel tank with externally visible level: easier management of refuelling stops.

Pruning Chainsaws

The power, maneuverability and accuracy required during pruning and tending of plants, olive groves and orchards are guaranteed by the quality of the **MTT 2500** pruning chainsaw. Maneuverable, lightweight and powerful: the combination of these three aspects in a single product make the **MTT 2500** the perfect tool for efficient, quick and safe pruning operations. Some of the main characteristics of this chainsaw, which is designed to turn your passion or your job into genuine pleasure, are its lightweight, perfect balance in all conditions, ergonomic design and high cutting speed.

Power, ergonomics and balance are the distinguishing features of the **MTT 3600** chainsaw. Its compact design matched with an excellent power to weight ratio, makes it the ideal chainsaw for pruning tasks at height on tall trees, for limbing and for felling. Its ability to handle the toughest jobs makes it the perfect tool in the hands of professional tree-climbers. The low-emission eco-friendly engine is protected by a double air filter in foam and nylon, and the high-speed high-power chain guarantees clean and accurate cuts without damaging the bark. The range of **MTT** professional pruning chainsaw models features AlwaysOn and EasyOn devices, snap hook and easy opening of the filter cover.

Models **MTT 2500** and **MTT 3600** are designed by **Giugiaro**, a world leading brand in the industrial design field.

Precision, safety and freedom of movement: all the ingredients of the perfect cut.

Common features

For an accurate and clean cut, it is essential to employ reliable machines that combines power with maneuverability and ease of use. **Efco** hedge trimmers feature a high performance 2-stroke engine and adjustable high quality steel blades for the cleanest cut. With user comfort always on their mind, **Efco** has equipped its hedge trimmers with easy to reach controls to make any job a breeze.

1 High quality blades with top cutting edge ensure a clean and precise cut that will not damage vegetation. Equipped with adjustment system for adaptability to any type of foliage.

2 Professional grade aluminium gear case, drive linkage with pinion carried in bearings and rods with rollers; all combined to guarantee long life, low noise and minimal vibration.

3 "EasyOn" system to guarantee reduced effort and speed of starting.

4 Model with double-edged blade has 180° swivel handle for easy trimming even when working at an angle.

5 Large paper air filter for higher filtration capacity and more effective engine protection, even in dusty conditions.

6 Anti-vibration system utilizing four springs guaranteeing total isolation from the operator's hands.

Lawns, ditches, undergrowth :
a perfect cut knows no obstacles.

Common features

You might need to trim borders, tidy your garden or clear undergrowth: for each one of these tasks you can always find just the right **Efco** trimmer or brushcutter. Each **Efco** trimmer and brushcutter is fitted with specially designed engines, characterized by high torque even at low RPMs. Also worthy of mention are the self-lubricating bushings and ergonomic handles designed to prove maximum operator comfort. Additional features include an oversized clutch, steel drive shaft and a two-ring piston to make these machines safe, dependable and durable.

1 Forged steel crankshaft and piston with two rings : guarantees longer working life.

2 Ergonomic loop and handles : clad in soft rubber to provide an ergonomic and comfortable grip of the tool in all operating conditions.

3 The “AlwaysOn” system ensures the machine is ready to start every time.

4 Filter support with anti-backflow element (Emak patent): prevents the filter from becoming fouled by fuel and guarantees longer operation between filter maintenance.

5 User-friendly starting system that ensures smooth engine pick-up with no kickback and a limited number of pulls.

6 Large size paper air filter for higher filtration capacity, guaranteeing excellent protection of the engine also in very dusty conditions (models **DS 2700**, **DS 3000**, **DS 3500**).

Earth Auger

This earth auger is ideal for small drilling operations on rural terrain, such as planting vines or trees, drilling holes for greenhouse poles or fence uprights. In this case the job can be done by just one operator. Model **TR 1551** is particularly safe and comfortable: all the controls are combined on the ergonomic handgrip, including a safety lever to protect against uncontrolled acceleration.

- 1 Features accidental acceleration prevention lever and ergonomically designed handle for increased comfort.
- 2 Quick-fit pinned coupler for swift attachment and replacement of auger.
- 3 Augers and extension available for a variety of application.
- 4 Diaphragm carburetor allows the machine to operate in any position without fuel leaking.

○ compatible tools

Split-Boom Powerhead

DS 2400 D

Brushcutter

Featuring our Load&Go trimmer head, the brushcutter attachment makes short work of tall grass and light brush.

61379150

Tube diameter	24 mm
Cutting head	4.3" Load&Go head with .095" line
Weight of attachment with Powerhead	2.8 lb / 12 lb

Hedge trimmer

Practical and maneuverable thanks to an optimal ratio between weight and balance; 12 adjustment positions make it possible to change the angle of the blades to adapt them to match your needs. The 35" shaft enables the operator to trim hedges up to 9.8' high.

61379120

Blade length	19.7" (50 cm)
Head	12 positions from 0° to 180°
Blade pitch	1.4"
Weight of attachment with Powerhead	6.1 lb / 15.3 lb

Blower

After cutting the grass, trimming the hedge and pruning the trees, the "no tools" quick fit system makes it possible to install the blower attachment: the ideal tool to remove leaves, bush and debris from your work area.

61379130

Air flow rate	353 cfm
Air velocity	134 mph
Weight of attachment with Powerhead	3.2 lb / 12.4 lb

Load&Go trimmer head standard with .095" (2.4 mm) diameter line.

Piston with 2 rings, die-cast cylinder with nickel plating, forged connecting rod and crankshaft: guarantee of ruggedness and durability.

User-friendly starting system ensures a smooth pick-up of the engine with no kickback, and limits the number of pulls required.

Machine equipped with "no tools" quick fit system: a device designed to enable installation of 4 different applications without the use of tools.

Seven spline shaft for great power transfer and excellent mating surface wear.

Pruner

Versatile application that makes it possible to prune branches and bushes of all types of up to 9.8' in height, ensuring healthy growth and vegetation. The pruner can be adjusted through 5 intermediate positions from 0° to 90° to allow a better view of the cutting area.

61379110

Length of complete machine	6.5' (2 m)
Bar length	10"
Chain (pitch x gauge)	3/8" x .043"
Oil tank capacity	6 fl. oz (180 ml)
Weight of attachment with Powerhead	4.8 lb / 14 lb

Shaft extension

Fitting the 30" shaft extension makes it possible to increase the length of the drive tube in order to reach taller hedges and branches. Recommended for pruner and hedgetrimmer applications.

61379140

Tube diameter	24 mm
Additional Weight	1.5 lb
Additional Length	30" (76.2 cm)

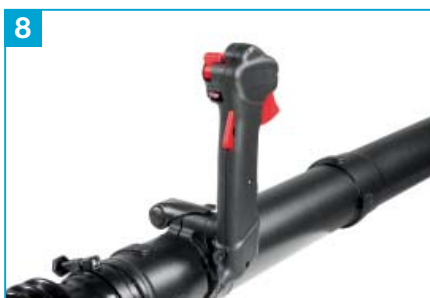

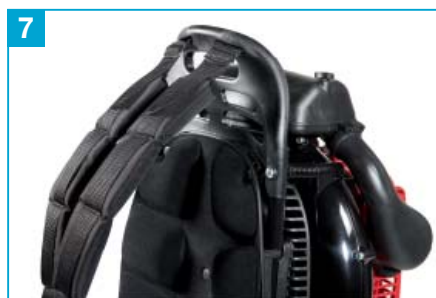

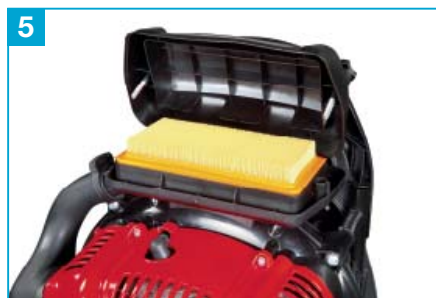

DS 2400 D SPECIFICATIONS

- **21.7 cc 1.2 HP (0.9 kW) 2-stroke engine:** featuring generous torque output with a linear power curve even at low revs.
- Ecologically advanced (EPA3/CARB), low noise, lightweight and with minimal fuel consumption.
- **Machine equipped with "no tools" quick fit system:** a device designed to enable installation of 4 different applications without the use of tools. Its possible to switch between applications rapidly and with just a few actions, while also reducing space requirements for transportation and storage.
- **"Easy On" device:** composed of a double spring in the starter cover combined with driver with two ratchets means reduced force with each pull and fast starting with fewer pulls.
- **Digital coil with electronic control and rev limiter:** for easier starting, enhanced performance thanks to uniform combustion, and reduced fuel consumption.
- **Innovative 4.3" (11 cm) diameter Load&Go head with .095" (2.4 mm) diameter line:** for straightforward and fast line replacement, just 30 seconds to rewind the line and resume work.
- **24 mm diameter aluminum drive tube with self-lubricating bearings** to ensure smooth movement of the shaft for greater operator comfort. Aluminum bevel drive with M10 pivot designed to transfer the engine power to the cutting tool in an optimal manner.
- **On/Off switch:** returns automatically to the "On" position after each stop (Always On).
- **Filter support with carburetor anti-backflow element (Emak patent):** prevents the filter from becoming fouled by fuel and guarantees longer operation between filter maintenance operations.
- **A compact engine and balanced weight distribution** allows for easy maneuverability and control in all working conditions and applications.

Cleaning up the yard has never been such a breeze, until now.

Common features

Efco has powerful and efficient blowers that can quickly clear any area of leaves, grass clippings or any other debris. The handheld blower built with the homeowner in mind, can be quickly changed into a vacuum, while the backpack blower offers more power to cover more ground. Light, simple, and silent, these machines are invaluable and dependable.

1 “VibCut” professional anti-vibration system featuring mounts with 4 steel springs to isolate the operator totally from machine vibrations (model **SA 3000**).

2 Rubber covered handle ensures a firm and comfortable grip on the machine, while at the same time isolating the hands of the operator from vibrations.

3 Vacuumed material is chopped up by a rotor with 4 steel blades (standard feature) to reduce the volume when inside the bag, down to 1/12 of original size, so that more work can be done with fewer emptying stops (model **SA 3000**).

4 Double bladed fan delivers high performance in terms of air flow and velocity while increasing the cooling capacity of the engine.

5 Paper air filter with increased capacity and filtration surface area allows efficient and quick maintenance and is more durable.

6 Digital coil with variable ignition advance and flywheel with new fin geometry ensures a smoother running engine and more efficient cooling.

7 Ergonomic backpack equipped with large and comfortable support straps which minimizes vibration (models **SA 2062**, **SA 9500**).

8 Throttle mounted directly on the blower tube to ensure continuous control of air flow (model **SA 9500**).

Handheld Blower and Vacuum Cleaner

Ideal to clear the garden of leaves and other small debris or grass cuttings, the handheld blower is designed to get the job done quickly and efficiently. Model **SA 3000** combines high performance with silent operation so it can be used in built-up residential areas. This model also features very low vibration levels thanks to the rubber-clad handle and VibCut professional antivibration system. With the dedicated conversion kit, which is available to order, the appliance can be converted into a handy vacuum cleaner with a 36 litre collection bag to create a practical tool for the removal of leaves, grass cuttings or light debris.

Power	1.3 HP
Displacement	30.5 cc
Max air volume	424 cfm
Max air speed	156.6 mph
Vacuum attachment	yes, optional
Noise level	68 dB(A)
Dry weight, without blower tube	9.9 lb

Backpack Blowers

Backpack blowers are designed to operate readily and accurately ensuring superior performance levels while optimising job completion times. Models **SA 2062** and **SA 9500** are designed for use in rural areas for clearing spaces such as farmyards and forecourts and in the city for clearing parks, stadiums, flowerbeds and roads. They are also ideal for moving and compacting fruit and other produce as it falls from the tree. Lightweight plus high air velocity and air delivery volume mean these tools can guarantee practicality, power and high performance. **SA 9500** is equipped with a telescopic tube that can be adjusted according to the operator's height without tools.

SA 2062

Power	4.5 HP
Displacement	61.3 cc
Max air volume	706 cfm
Max air speed	202 mph
Fuel tank capacity	77.8 fl. oz.
Sound level	83 dB(A)
Dry weight, without blower tube	20.6 lb

SA 9500

Power	5 HP
Displacement	77 cc
Max air volume	954 cfm
Max air speed	190 mph *with nozzle installed
Fuel tank capacity	77.8 fl. oz
Sound level	78 dB(A)
Dry weight, without blower tube	22.9 lb

Bar & chain oil

Description

Efco Bar & Chain Oil is specifically formulated to optimize cutting with any chain saw. A special blend of virgin oils, tackifier agents, rust and oxidation inhibitors create the ideal bar and chain oil.

- Contains increased levels of tackifier to reduce fling-off and maintain optimal lubrication.
- Formulated with the finest base oils and additives to provide excellent performance in a wide temperature range.
- Works optimally in both extreme hot and cold conditions.
- Contains additives that reduce heat and prevent premature bar wear.

Part

1 Quart	EUSA50075
1 Gallon	EUSA50074

2-Cycle oil

Description

Efco 2-Cycle Oil is designed for maximum engine protection and easy starting. Our semisynthetic, smokeless oil features outstanding lubricity to maximize engine life.

- The only oil designed and approved by **Efco** engineering for maximum engine life.
- Added detergents to keep engine ports and rings free of carbon for easy starting.
- Added E10 Compatible fuel stabilizers to keep carburetor clean for easy starting.
- Exceeds JASO FD rating standards!

Part

50:1, 1 Gal Mix 2.6 fl oz	EUSA50072
50:1, 2 Gal Mix 5.2 fl oz	EUSA50076
50:1, 2.5 Gal Mix 6.4 fl oz	EUSA50073

25-Hour Detergency Test

Efco®

- Very good detergent
- Excellent lubricity
- Ring is free & functioning
- Ports are clean

Others

- Poor detergent
- Blockage in port
- Ring is predominantly stuck
- Results in loss of power and performance

Attribute

Technology Overview

Benefits

Lubricity

The unique blend of quality base oils including synthetics and high tech additives in **Efco** 2-Cycle Engine Oil help to achieve industry leading lubricity needed in high performance 2-Cycle power equipment applications.

- Increased reliability
- Reduced component wear
- Reduced heat

Detergency

A cutting edge "ring-free" additive used in the **Efco** 2-Cycle Engine Oil formulation helps keep engine's rings free, exhaust ports from blocking and reduces carbon buildup inside your engine.

- Easy starting
- Better fuel efficiency

Stability

Built-in fuel stabilizers in **Efco** 2-Cycle Engine Oil help extend the life of your fuel and internal equipment components during prolonged storage or seasonal equipment use. Unique antioxidants also address the negative aspects of E10 fuel.

- Easy starting
- Helps keeps fuel mix fresh for up to 12 months

Low Smoke

The proper combination of premium base oils in **Efco** 2-Cycle Engine Oil means very little smoke during start-up and operation, which helps make the use of your equipment more pleasurable.

- Low odor
- Operator friendly

Efco knows safety is crucial when working with outdoor power equipment. That is why **Efco** provides a variety of safety apparel products. From protective helmets to universal utility gloves, **Efco** has you covered.

Professional Helmet				
	Description	Features ear muffs and face shield for all around protection. Adjustable strap inside for a better fit. Meets ANSI Z89.1 standard.		
	Part		EUSM60356	
Universal Utility Gloves				
	Description	Durable gloves made with polyester and leather. Comfort padding palms with elasticized cuffs.		
	Part	large	EUSM60358	
		extra large	EUSM60359	
Safety Glasses				
	Description	Wrap around design for better protection while using equipment.		
	Part	tinted	EUSA50102	
		clear	EUSM60086	
Professional Chaps				
	Description	Apron style chaps featuring Prolar padding for extra protection and quick release buckle.		
	Part	length 36"	EUSM60362	
		length 39"	EUSM60363	
Ear Muffs				
	Description	Made with PVC+foam insulation and shock absorbent material. Adjustable stainless steel headband. Noise Reduction Rating (NRR) of 28 dB(A). Meets ANSI S3.1974 standard.		
	Part		EUSM60357	
Ear Plugs				
	Description	Plastic ear plugs with 23 dB(A) rating for better protection. Comes with key chain case.
