WARRANTY	3 year limited residential 90 day limited commercial	3 year limited residential 1 year limited commercial	3 year limited residential 1 year limited commercial
PRICE	\$3359	\$4561	\$5897

• BRUSH ROTATION ANGLE (LEFT / RIGHT): 40°
• ALL-SEASON USE

• HEIGHT ADJUSTMENT SYSTEM
• AUTO-TURN™ STEERING

Selecting the right mower!

Selecting the right mower is not an easy task. But if you pick the right mower for your yard it can save you time and money. Here are a few helpful hints to help you find your next mower.

Yard size

Selecting the right mower starts with the size of your yard. Matching the deck size will help you mow more efficiently. See the chart below for recommended deck sizes.

Yard size	Recommended deck size	Recommended product
Less than 21 000 ft ²	53 cm (21") 56 cm (22")	Lawn mowers
21 000 to 43 000 ft ²	Up to 107 cm (42")	Edge™, Ikon XD
43 000 to 87 000 ft ²	107 cm to 122 cm (42" to 48")	Edge™, Ikon XD, Apex®, Zenith
87 000 ft ² or more	117 cm to 152 cm (46" to 60")	Ikon XD, Apex®, Zenith

Number of obstacles in your yard

Maneuvering around obstacles is necessary when mowing. If there are many obstacles such as trees, flower beds or landscaping in your yard, a zero-turn or a walk behind mower may be the best choices. Tractors can be limited in their ability to maneuver around objects and may require additional follow-up trimming.

ZERO-TURN MOWER BENEFITS

YOU CAN CUT YOUR MOWING TIME IN HALF USING A ZERO-TURN INSTEAD OF A LAWN TRACTOR. HERE ARE SOME OF THE TIME-SAVING FEATURES OF ZERO-TURN TECHNOLOGY.

FASTER SPEED

Zero-turn are designed to cut grass nearly twice as fast as traditional lawn tractors so your straight line mowing speed is improved.

MANEUVER AROUND OBSTACLES

The maneuverability of zero-turn allows you to easily mow around trees, flower beds and other obstacles in your yard more easily than with a steering wheel vehicle such as a riding lawn tractor.

MOW IN A SINGLE PASS

When you get to the end of your yard and have to turn around and come back, you literally can spin 180° and come straight back without having to back up and cut the strips of grass you would miss when making the turn with a lawn tractor. When all things are equal, a zero-turn will allow you to cut your lawn more efficiently.
